

Dear Users:

HK training is based on an excellent scene designed by YFCAD Hong Kong agent Ms.Connie who is an outstanding InteriCAD T5 operator. We are proud to present this training course to help you remake this scene quicker and better. The renderings of this scene is in Rendering file folder.

Instruction

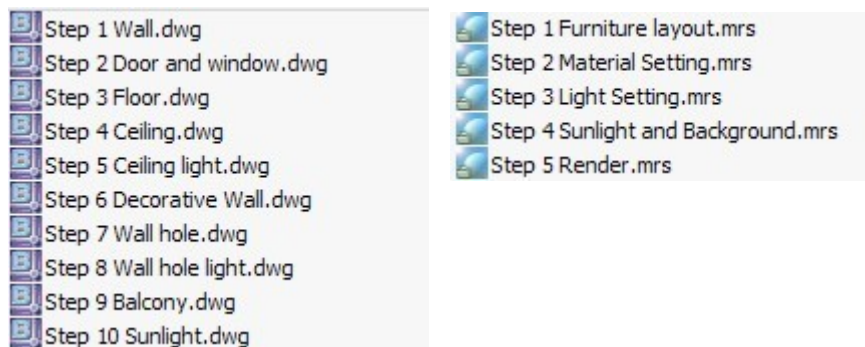

1.Install the material package by double click on the **HK training .exe**

After installing this package , you will find a new catalogue **HK training** course created under library menu. All the furniture and decoration that will be used in this scene are included in this package.

(You can choose *HK training T5/T6.exe* according to your InteriCAD version.)

2.The other mapping and IES file are in texture file folder.

3.This training course provides scene making process: 10 dwg files and 5 mrs files. You can find them in *Make scene step by step* file folder.

If you encounter any problem when you are making the scene, you can check these files and compare your design with them.
